

The three laws of Clarke

Isidro Cano

Senior Telecommunication Engineer, High Performance Computer Manager Iberia, HP
Spain

Abstract

This presentation starts from the messages of Arthur C. Clarke about the concept of impossibility and science, as the basis of the challenging in providing huge computer infrastructure for countries like Spain and Portugal. Today we have some computer sites up and running, affording important collaboration projects, so the proposal from HP is to spread and increase this infrastructure in order to leverage Iberia in the highlight world of research and development. The speech will also cover new products in HPC in terms of hardware, software and networking.
